## **SELPA & IEP FORMS**

### **15.1 SCOPE and PURPOSE**

All districts within the SELPA must use the SELPA approved web-based IEP system (SEIS) for development of IEPs and maintenance of the special education electronic IEP database. These IEP forms have been repeatedly refined to better meet the requirements and intent of special education laws as well as to be more manageable by those using them. The forms have been modified to be in compliance with the Individuals with Disabilities Education Act (IDEA) 2004, the California Education Code and CASEMIS requirements.

### **15.2 IEP Forms**

All SELPA-approved IEP forms are available on SEIS. Instructions for the IEP forms are in the SELPA manual available on the SELPA website and SEIS library. In the event the web-based IEP system is not available, IEPs can be completed using Word and PDF form templates that are available in the SEIS Document Library. More information about IEP development including training and other resource materials and guides are available on the SELPA website and SEIS.
